Hi Brittney,

I've received calls from two SL95 descendants and three professional genealogists who are helping with this research. They've expressed that the research that you've conducted on Ancestry links five of the SL95 to the wrong families. We have not reviewed all of your research so I cannot comment on the rest of your research.

I reviewed the ancestral line for one the descendants who contacted me and the information you entered in Ancestry is conflicting.

Will you change your settings to private for the SL95? We are working to make sure we have completed an exhaustive search so as not to confuse anyone.

Let me know if you have any questions. Thanks.

Hi Helen, can you tell me which trees you believe contain errors? I am more than willing to work through them and correct any inconsistencies. We know genealogy isn't an exact science, so there's bound to be mistakes or conflicting information here and there. I welcome any new information we can get!

For us, the goal of this project is to help people connect to their history and their ancestors. The reason our trees exist and the reason they're public is because we want people to find them and interact with them. We want to make this information more accessible. I'm interested and open to hearing why you think it better to do this work in private.

Please give me a call when you can [REDACTED]

Best,

Hi Brittney,

You misunderstand. We want the work to be public, we just want to be sure an exhaustive search has been conducted.

Hey Helen, can you send me the list of the trees you mentioned? I want to look into them.
